2. Description

The LT6711GX is HDMI2.1 to DP1.4 converter with internal Type-C Alternate Mode switch and PD controller.

For HDMI2.1 input, LT6711GX can be configured as 3/4 lanes. Adaptive equalization makes it suitable for long cable application and the maximum bandwidth is up to 32Gbps. It allow for the highest resolutions of 8K@30Hz or 8K@60Hz with compression data.

For DP1.4 output, it consists of 4 data lanes, support 1.62, 2.7, 5.4 or 8.1Gbps link speeds. The build-in optional SSC function reduces EMI effect.

In order to be adaptable to the latest USB Type-C system, LT6711GX integrates a high performance bi-directional Super-Speed controlled by CC logic and PD management unit to relieve mobile system design complexity and BOM cost.

The device is capable of automatic operation which is enabled by an integrated microprocessor that uses an embedded SPI flash for firmware storage. System control is also available through the configuration I2C

slave interface.

LT6711GX is fabricated in advanced CMOS process and implemented in 10mmx10mm QFN88 package.

3. Applications

- Mobile systems, VR/AR
- Digital video cameras and Digital still cameras
- Cellular handsets, PAD/Tablets
