2. General Description

The LT6911UXE is a high performance HD-DVI2.0 to MIPI DSI/CSI converter for VR, Smart phone, Display applications.

The HD-DVI2.0 input supports data rate up to 6Gbps which provides sufficient bandwidth for 4k@60Hz video.

Also HDCP2.3 is supported for data decryption.

For MIPI DSI/CSI output, LT6911UXE features configurable single-port or dual-port MIPI DSI/CSI with 1 high-speed clock lane, and 1~4 high-speed data lanes operating at maximum 2.5Gbps/lane, which can support a total bandwidth of up to 20Gbps. LT6911UXE supports burst mode DSI video data transferring, also supports flexible video data mapping path. Two digital audio output interfaces are available, I2S and SPDIF. The I2S interface supports 8-ch LPCM and the SPDIF interface supports 2-ch LPCM or compressed audio, both at maximum 192kHz sample rate.

The device is capable of automatic operation which is

enabled by an integrated microprocessor that uses an embedded SPI flash for firmware storage. System control is also available through the configuration I2C slave interface.

3. Applications

- Mobile system
- Display
